Class Policies

General Rules

Learning Online is very challenging since the lecturer and students are all in their own places. We are going to create a positive learning environment by these simple guides.

- a. Video camera should be put on at all time
- b. Always putting cell phone on silent mode, and not using during class time
- c. You may want to open the power point notes and other electronic documents on your laptop, but refrain from using social media unless needed
- d. Avoid from doing other work except related to this class learning activities

Attendance and Class Participation

Attendance is important for success in his class. Participation is active learning activities during class will not only develop your critical thinking skills but also problem-solving skills. And it also counts to your grade for all the discussions.

Academic integrity

It is important to do your own work and not copy from other places including the internet. Academic dishonesty or cheating is defined as intentional act of fraud in which student seek to claim credit for the work or efforts of other people. Acts of dishonesty whether from assignments, or case studies, tests will be penalized.

Office Hours: To be confirmed (Via ZOOM). **Tentatively: 9:00 – 9:30 Wed** (and by appointments)
